Transfer to the city of concert (area max 80km)

Although it is France's second largest city, it has remembered and retained values of sharing that have shaped its territory for centuries and is still known as the "Phocaeen city" in memory of the ancient Greeks from Asia Minor who founded the city here.

It is a port city with a strong identity, and has also kept abreast of the changes throughout time to become an important capital of the Mediterranean Basin open to the world .

With over 300 days of sunshine per year, the summer starts earlier in Marseille than elsewhere. The mistral (the typical wind), which blows 90 days per year, paints the Marseille sky of purity and unique light that some of the greatest artists ever put down on their canvases.
